Under this quarterly rate structure, the District's average water user will see a change from a \$100.00 bill to a \$123.00 bill per quarter. With the changes, the District's rates continue to be comparable with the surrounding towns surveyed as part of the rate evaluation process. As a valued customer, you should know that 100% of water user rates are dedicated to operating the water system, maintaining and improving the significant infrastructure investment and ensuring compliance with all regulations from the EPA and Massachusetts Department of Environmental Protection (MassDEP).
